

Cat# ZBMM-72XL

A cost effective and stylish method of displaying a flat panel monitor between rooms, high traffic locations, and training sessions. Provides the basic platform for applications where just the monitor is in use, or add on accessories to build a multimedia platform to meet your individual needs for presentations and displays using computers, DVD players, speakers, wireless devices, etc. The Mobile Max Workstation is designed with an Extra Wide K-base (48" x 28") to provide stability for supporting large format monitors (42" to 61") and multiple standard monitors (1 to 3) on a mobile platform up to 170 lbs.

This includes:

- One sturdy aluminum 72" post features adjustment holes spaced 1" apart and span the entire length for height adjustment of the monitor and to allow the addition of accessory shelving, speaker bars, cord bins, and CPU tower holder.
- Vertical pole features cord management channels in the front and back and adjustable cord management clips to keep power and data cables neat.
- One 48" x 28" extra wide mobile base
- K-base design includes four 4" locking casters and features flex adjustment to provide a stable platform by keeping all four casters in constant contact with the floor on uneven surfaces. The unique design also allows the user to place the workstation against a wall.
- One push handle
- Adjustable mounting arms are geared to be width and height adjustable to fit the mounting hole pattern on most flat panel monitors 42" to 61" diagonal up to 170 lbs. and with a mounting hole pattern 400mm wide x 200mm high or greater.
- Adjustable arms may be easily rotated with the touch of a finger to use the monitor in landscape to portrait format.
