

Head End Immobilizers

15 lb platinum angle irons fastened to light blue vinyl covered standard foam to immobilize the skull and prevent movement. Heat sealed seams to prevent fluid contamination. Seams will show during imaging applications especially using low kVp techniques. Non-skid rubber pads on bottom prevent movement. Frame dimensions: 6"H x 8"W Sold in pair

Immobilizing Head Paddles

Head paddles: 7" diameter, 2.5" thick foam pad is secured to a rigid plastic base with handles for easy gripping. Allows technologists to hold a patient's head without exposing their hands and keeping them out of the field of view. Available as coated and uncoated. Coated foam may show on image. Sold as a pair.

Cat# RHI-HP (Non-coated)

Cat# RHI-CP (coated)
